

RISK DISCLOSURE AND WARNINGS NOTICE

PART A – RISKS ASSOCIATED WITH ALL FINANCIAL INSTRUMENTS

1. Introduction

1.1. This risk disclosure and warning notice is provided to you (our Client and prospective Client) in compliance with the Provision of Investment Services, the Exercise of Investment Activities, the Operation of Regulated Markets and Other Related Matters Law 144(I)/2007, as subsequently amended from time to time (“the Law”), which is applicable to OX Capital Markets Ltd (“the Company”).

1.2. All Clients and prospective Clients should read carefully the following risk disclosure and warnings contained in this document, before applying to the Company for a trading account and before they begin to accept any services from the Company. However, it is noted, that this document cannot and does not disclose or explain all of the risks and other significant aspects involved in dealing in Financial Instruments (e.g. Contract for Difference (“CFDs”), Binary Options).. The notice was designed to explain in general terms the nature of the risks involved, when dealing in Financial Instruments on a fair and non- misleading basis.

2. Charges and Taxes

2.1. The Provision of Services by the Company to the Client is subject to fees, available on the Company’s website. Before the Client begins to trade or accept any services from the Company, he should obtain details of all fees, commissions, charges, for which the Client will be liable. It is the Client’s responsibility to check for any changes in the charges.

2.2. If any charges are not expressed in monetary terms (but, for example, as a percentage of contract value), the Client should ensure, that he understands what such charges are likely to amount to.

2.3. The Company may change its charges at any time, according to the provisions of the Client’s Agreement, found on the Company’s website.

2.4. There is a risk, that the Client’s trades in any Financial Instruments may be or become subject to tax and/or any other duty, for example because of changes in legislation or his personal circumstances. The Company does not warrant that no tax and/or any other stamp duty will be payable. The Company does not offer tax advice and recommends, therefore the Client should seek advice from a competent tax professional, if the Client has any questions.

2.5. The Client is responsible for any taxes and/or any other duty, which may accrue in respect of his trades.

2.6. It is noted that taxes are subject to change without notice.

2.7. If required by applicable Law, the Company shall deduct at source from any payments due to the Client, such amounts as are required by the tax authorities to be deducted, in accordance with applicable Law.

2.8. It is possible, that other costs, including taxes, relating to Transactions, carried out on the Trading Platform, may arise for which the Client is liable and which are neither paid by us, nor imposed by the Company. Although it is the Client's sole and entire responsibility to account for tax due and without derogating from this, the Client agrees, that the Company may deduct tax, as may be required by the applicable law, with respect to his trading activity on the Trading Platform. The Client is aware, that the Company has a right of set-off against any amounts in the Client's Trading Account, with respect to such tax deductions.

2.9. It is noted, that the Company's prices in relation to CFDs, Binary Options trading are set by the Company and may be different from prices reported elsewhere. The Company's trading prices are the ones, at which the Company is willing to sell CFDs, Binary Options to its Clients at the point of sale. The prices displayed on the Company's Trading Platform, reflects the last known available price at the moment, prior to placing any Order, however, the actual execution price of the Order may differ, in accordance with the Company's Best Interest and Order Execution Policy and Client's Agreement. As such, the price that the Client receives, when he opens or closes a position, may not directly correspond to real time market levels at the point in time, at which the sale of Binary Option or CFD occurs or reflect the prices of third party brokers/providers.

3. Third Party Risks

3.1. It is understood, that the Company will promptly place any Clients' money it receives into one or more segregated account(s) (denoted as 'clients' accounts') with reliable financial institutions (within or outside Cyprus or the EEA), such as a credit institution or a bank in a third country. Although the Company shall exercise due skill, care and diligence in the selection of the financial institution according to Applicable Regulations, it is understood, that there are circumstances beyond the control of the Company and hence the Company does not accept any liability or responsibility for any resulting losses to the Client, as a result of the insolvency or any other analogous proceedings or failure of the financial institution, where Clients' money will be held.

3.2. The financial institution (of paragraph 3.1.) where Clients' money will be held, may be within or outside Cyprus or the EEA. It is understood, that the legal and regulatory regime applying to any such financial institution outside Cyprus or the EEA, will be different from that of Cyprus. Hence, in the event of the insolvency or any other equivalent failure or preceding of

that person, the Client's money may be treated differently from the treatment, which would apply if the money was held in a Segregated Account in Cyprus.

3.3. The financial institution to which the Company will pass Clients' money (as per paragraph 3.1.), may hold it in an omnibus account. Hence, in the event of the insolvency or any other analogous proceedings, in relation to that financial institution, the Company may only have an unsecured claim against the financial institution on behalf of the Client, and the Client will be exposed to the risk, that the money received by the Company from the financial institution is insufficient to satisfy the claims of the Client.

3.4. The Company may deposit Clients' money with a depository, who may have a security interest, lien or right of set-off in relation to that money.

3.5. A Bank or Broker through whom the Company deals with, could have interests contrary to the Client's Interests.

4. Insolvency

4.1. The Company's insolvency or default, may lead to positions being liquidated or closed out, without the Client's consent and as result the Client may suffer losses.

5. Investor Compensation Fund

5.1. The Company participates in the Investor Compensation Fund for clients of Investment Firms regulated in the Republic of Cyprus. Certain clients will be entitled to compensation under the Investor Compensation Fund, where the Company fails. Compensation shall not exceed twenty thousand Euro (EUR 20.000) for each entitled Client. For more details please refer to the "Investor Compensation Fund" found on our website.

6. Technical Risks

6.1. The Client and not the Company shall be responsible for the risks of financial losses, caused by failure, malfunction, interruption, disconnection or malicious actions of information, communication, electricity, electronic or other systems.

6.2. If the Client undertakes transactions on an electronic system, he will be exposed to risks associated with the system, including the failure of hardware, software, servers, communication lines and internet failure. The result of any such failure may be, that his order is either not executed according to his instructions or it is not executed at all. The Company does not accept any liability in the case of such a failure.

6.3. The Client acknowledges, that the unencrypted information transmitted by e-mail is not protected from any unauthorized access.

6.4. At times of excessive deal flow the Client may have some difficulties to be connected over the phone or the Company's Platform(s)/system(s), especially in fast Market (for example, when key macroeconomic indicators are released).

6.5. The Client acknowledges, that the internet may be subject to events, which may affect his access to the Company's Website and/or the Company's trading Platform(s)/system(s), including but not limited to, interruptions or transmission blackouts, software and hardware failure, internet disconnection, public electricity network failures or hacker attacks. The Company is not responsible for any damages or losses, resulting from such events, which are beyond its control or for any other losses, costs, liabilities, or expenses (including, without limitation, loss of profit), which may result from the Client's inability to access the Company's Website and/or Trading System or delay or failure in sending orders or Transactions.

6.6. In connection with the use of computer equipment and data, and voice communication networks, the Client bears the following risks amongst other risks, in which cases the Company has no liability of any resulting loss:

- (a) Power cut of the equipment on the side of the Client or the provider, or communication operator (including voice communication) that serves the Client;
- (b) Physical damage (or destruction) of the communication channels used to link the Client and provider (communication operator), provider, and the trading or information server of the Client;
- (c) Outage (unacceptably low quality) of communication via the channels used by the Client, or the Company or the channels used by the provider, or communication operator (including voice communication), which are used by the Client or the Company;
- (d) Wrong or inconsistent with requirements settings of the Client Terminal;
- (e) Untimely update of the Client Terminal;
- (f) When carrying out transactions via the telephone (land or cell phone lines) voice communication, the Client runs the risk of problematic dialing, when trying to reach an employee of the broker service department of the Company, due to communication quality issues and communication channel loads;
- (g) The use of communication channels, hardware and software, generate the risk of non - reception of a message (including text messages) by the Client from the Company;
- (h) Trading over the phone might be impeded by overload of connection;
- (i) Malfunction or non-operability of the Platform, which also includes the Client Terminal.

6.7. The Client may suffer financial losses, caused by the materialization of the above risks, the Company accepts no responsibility or liability, in the case of such a risk materializing and the Client shall be responsible for all related losses, he may suffer.

M A R K E T S

7. Trading Platform

7.1. The Client is warned, that when trading in an electronic platform he assumes risk of financial loss, which may be a consequence of amongst other things:

- (a) Failure of Client's devices, software and poor quality of connection.
- (b) The Company's or Client's hardware or software failure, malfunction or misuse.
- (c) Improper work of Client's equipment.
- (d) Wrong setting of Client's Terminal.
- (e) Delayed updates of Client's Terminal.

7.2. The Client acknowledges, that only one Instruction is allowed to be in the queue at one time. Once the Client has sent an Instruction, a new Instruction can be given to the Company.

7.3. The Client acknowledges, that the only reliable source of Quotes Flow information is that of the live Server's Quotes Base. Quotes Base in the Client Terminal is not a reliable source of Quotes Flow information, because the connection between the Client's Terminal and the Server may be disrupted at some point and some of the Quotes simply may not reach the Client Terminal.

7.4. The Client acknowledges, that when the Client closes the order placing/ deleting window or the position opening/closing window, the Instruction, which has been sent to the Server, shall not be cancelled.

7.5. Orders may be executed one at a time, while being in the queue. Multiple orders from the same Client's Account at the same time may not be executed.

7.6. The Client acknowledges, that when the Client closes the Order, it shall not be cancelled.

7.7. In case the Client has not received the result of the execution of the previously sent Order, but decides to repeat the Order, the Client shall accept the risk of making two Transactions instead of one.

7.8. The Client acknowledges, that if the Pending Order has already been executed, but the Client sends an instruction to modify its level, the only instruction, which will be executed, is the instruction to modify Stop Loss and/or Take Profit levels on the position opened when the Pending Order triggered.

8. Communication between the Client and the Company

8.1. The Client shall accept the risk of any financial losses, caused by the fact, that the Client has received with delay or has not received at all any notice from the Company.

8.2. The Client acknowledges, that the unencrypted information transmitted by e-mail is not protected from any unauthorised access.

8.3. The Company has no responsibility, if unauthorized third persons have access to information, including electronic addresses, electronic communication and personal data, access data, when the above are transmitted between the Company and the Client or when using the internet or other network communication facilities, telephone, or any other electronic means.

8.4. The Client is fully responsible for the risks in respect of undelivered Company's Online Trading System internal mail messages sent to the Client by the Company.

9. Force Majeure Events

9.1. In case of a Force Majeure Event the Company may not be in a position to arrange for the execution of Client Orders or fulfill its obligations under the agreement with the Client. As a result the Client may suffer financial loss.

9.2. The Company will not be liable or have any responsibility for any type of loss or damage, arising out of any failure, interruption, or delay, in performing its obligations under this Agreement, where such failure, interruption or delay is due to a Force Majeure event.

10. Abnormal Market Conditions

10.1. The Client acknowledges that under Abnormal Market Conditions, the period during which the Orders are executed, may be extended or it may be impossible for Orders to be executed at declared prices or may not be executed at all.

10.2. Abnormal Market Conditions include, but not limited to times of rapid price fluctuations of the price, rises or falls in one trading session to such an extent that, under the rules of the relevant exchange, trading is suspended or restricted, or there is lack of liquidity, or this may occur at the opening of trading sessions.

11. Foreign Currency

11.1. When a Financial Instrument is traded in a currency other than the currency of the Client's country of residence, any changes in the exchange rates may have a negative effect on its value, price and performance, and may lead to losses for the Client.

PART B – GENERAL INFORMATION ON RISKS ASSOCIATED WITH SPECIFIC FINANCIAL INSTRUMENTS

12. Introduction

General Risk Warning For Complex Financial Instruments (Derivative Financial Instruments such as CFDs and Binary Options)

Trading CFDs and Binary Options can put Client's capital at risk, especially if used in a speculative manner. Both CFDs and Binary Options are categorised as high risk complex Financial Instruments and Clients may lose the amount invested.

The investment decisions made by the Clients and the investment advice, provided by the Company to Clients, are subject to various markets, currency, economic, political, business risks etc., and will not necessarily be profitable.

The Client acknowledges and without any reservation accepts, that notwithstanding any investment advice or information, which may have been given by the Company, the value of any investment in Financial Instruments may fluctuate either upwards or downwards. The Client acknowledges and without any reservation accepts, the existence of a substantial risk of incurring losses and damages, as a result of buying or selling any Financial Instrument and acknowledges his willingness to take such risk.

Set out below is an outline of the major risks and other significant aspects of CFDs and Binary Options trading:

12.1. Trading in CFDs and Binary Options is VERY SPECULATIVE AND HIGHLY RISKY and is not suitable for all members of the general public, but only for those investors who:

- (a) understand and are willing to assume the economic, legal and other risks involved,
- (b) taking into account their personal financial circumstances, financial resources, life style and obligations, are financially able to assume the loss of their entire investment,
- (c) have the knowledge to understand CFDs and Binary Options trading and the Underlying assets and Markets.

12.2. The Company may provide the Client with information and tools, produced by third parties on an "as is" basis (i.e. the Company does not approve, or endorse, or affect the said information and or tools), which may be indicative of trading trends or trading opportunities. The Client accepts and understands, that taking any actions based on the information and/or tools provided by third parties may result in losses and or general reduction of value of the Client's assets. The Company does not accept liability for any such losses, resulting from actions taken by the Client on the basis of information and or tools produced by third parties.

12.3. CFDs and Binary Options are derivative financial instruments, deriving their value from the prices of the underlying assets/markets, in which they refer to (for example currency, equity indices, stocks, metals, indices futures, forwards etc.). Although, the prices at which the Company trades are set by an algorithm, developed by the Company, the prices are derived from the Underlying Assets /market. It is important therefore, that the Client understands the risks associated with trading in the relevant underlying asset/ market, because fluctuations in the price of the underlying asset/ market will affect the profitability of his trade.

12.4. Information of the previous performance of a Financial Instrument does not guarantee its current and/or future performance. The use of historical data does not constitute a binding or safe forecast, as to the corresponding future performance of the Financial Instruments, to which the said information refers.

12.5. Leverage and Gearing

12.5.1. Transactions in foreign exchange and derivative Financial Instruments carry a high degree of risk. The amount of initial margin may be small relative to the value of the foreign exchange or derivatives contract, so that transactions are "leveraged" or "geared".

12.5.2. A relatively small market movement will have a proportionately larger impact on the funds the Client has deposited or will have to deposit; this may work against the Client, as well as for the Client. The Client may sustain a total loss of initial Margin funds and any additional funds deposited with the Company to maintain his position. If the market moves against the Client's position and/or Margin requirements are increased, the Client may be called upon to deposit additional funds on short notice to maintain his position. Failing to comply with a request for a deposit of additional funds, may result in closure of his position(s) by the Company on his behalf and he will be liable for any resulting loss or deficit.

12.6. Risk-reducing Orders or Strategies

12.6.1 The placing of certain Orders (e.g. "stop-loss" orders, where permitted under local law, or "stop- limit" Orders), which are intended to limit losses to certain amounts, may not be adequate given, that markets conditions make it impossible to execute such Orders, e.g. due to illiquidity in the market. Strategies using combinations of positions, such as "spread" and "straddle" positions may be as risky as taking simple "long" or "short" positions. Therefore Stop Limit and Stop Loss Orders cannot guarantee the limit of loss.

12.6.2. Trailing Stop and Expert Advisor cannot guarantee the limit of loss.

12.7. Volatility

12.7.1. Some Derivative Financial Instruments trade within wide intraday ranges with volatile price movements. Therefore, the Client must carefully consider, that there is a high risk of losses as well as profits. The price of Derivative Financial Instruments is derived from the price of the Underlying Asset, in which the Derivative Financial Instruments refer to. Derivative Financial Instruments and related Underlying Markets can be highly volatile. The prices of Derivative Financial Instruments and the Underlying Asset may fluctuate rapidly and over wide ranges, and may reflect unforeseeable events or changes in conditions, none of which can be controlled by the Client or the Company. Under certain market conditions, it may be impossible for a Clients' order to be executed at declared prices leading to losses. The prices of Derivative Financial Instruments and the Underlying Asset will be influenced by, amongst other things, changing supply and demand relationships, governmental, agricultural, commercial and trade programs and policies, national and international political and economic events and the prevailing psychological characteristics of the relevant market place.

12.8. Margin

12.8.1. The Client acknowledges and accepts that, regardless of any information, which may be offered by the Company, the value of Derivative Financial Instruments may fluctuate downwards or upwards, and it is even probable, that the investment may become of no value. This is owed to the margining system applicable to such trades, which generally involves a comparatively modest deposit or margin in terms of the overall contract value, so that a relatively small movement in the Underlying Market can have a disproportionately dramatic effect on the Client's trade. If the Underlying Market movement is in the Client's favor, the Client may achieve a good profit, but an equally small adverse market movement can not only quickly result in the loss of the Clients' entire deposit, but may also expose the Client to a large additional loss.

12.9. Liquidity

12.9.1. Some of the Underlying Assets may not become immediately liquid as a result of reduced demand for the Underlying Asset and Client may not be able to obtain the information on the value of these or the extent of the associated risks.

12.10. Contracts for Differences

12.10.1. The CFDs available for trading with the Company are non-deliverable spot transactions giving an opportunity to make profit on changes in the Underlying Asset (cash indices, index futures, bond futures, commodity futures, spot crude oil, spot gold, spot silver, single stocks, currencies or any other asset according to the Company's discretion from time to time). If the Underlying Asset movement is in the Client's favour, the Client may achieve a good profit, but an equally small adverse market movement can not only quickly result in the

loss of the Clients' entire deposit, but also any additional commissions and other expenses incurred. So, the Client must not enter into CFDs, unless he is willing to undertake the risks of losing entirely all the money, which he has invested and also any additional commissions and other expenses incurred.

12.10.2. Investing in a Contract for Differences carries the same risks, as investing in a future or an option and the Client should be aware of these as set out above. Transactions in Contracts for Differences may also have a contingent liability and the Client should be aware of the implications of this, as set out below under "Contingent Liability Investment Transactions".

12.11. Options

12.11.1. Buying options: Buying options involve less risk, than selling options because, if the price of the underlying asset moves against the Client, the Client can simply allow the option to lapse. The maximum loss is limited to the premium, plus any commission or other transaction charges. However, if the Client buys a call option on a futures contract and he later exercise the option, he will acquire the future. This will expose the Client to the risks described under "Futures" and "Contingent Liability Investment Transactions".

12.11.2. Writing options: If the Client writes an option, the risk involved is considerably greater, than buying options. The Client may be liable for margin to maintain his position and a loss may be sustained well, in excess of the premium received. By writing an option, the Client accepts a legal obligation to purchase or sell the underlying asset if the option is exercised against him, however far the market price has moved away from the exercise price. If the Client already owns the underlying asset, which he have contracted to sell (when the options will be known as covered call options) the risk is reduced. If he does not own the underlying asset (uncovered call options) the risk can be unlimited. Only experienced persons should contemplate writing uncovered options, and then only after securing full details of the applicable conditions and potential risk exposure.

12.12. Off-exchange transactions in Derivative Financial Instruments

12.12.1. CFDs and Binary Options offered by the Company are off-exchange transactions. The trading conditions are set by us (in line with the trading conditions received by our liquidity providers), subject to any obligations we have to provide best execution, to act reasonably and in accordance with our Client's Agreement and with our Best Execution Policy. Each CFD and Binary Option, which the Client invests into through our Trading Platform, results in the entering of an Order with the Company; such Orders can only be closed with the Company and are not transferable to any other person. While some off-exchange markets are highly liquid, transactions in off-exchange or non-transferable derivatives may involve greater risk than investing in on-exchange derivatives, because there is no exchange market on which to close

out an Open Position. It may be impossible to liquidate an existing position, to assess the value of the position arising from an off-exchange transaction or to assess the exposure to risk. Bid prices and Ask prices need not be quoted, and, even where they are, they will be established by dealers in these instruments and consequently it may be difficult to establish what a fair price is.

12.12.2. In regards to transactions in CFD's and Binary Options the Company is using an Online Trading Systems for transactions in CFD's and Binary Options which does not fall into the definition of a recognized exchange as this is not a Multilateral Trading Facility and so do not have the same protection.

12.13. Contingent Liability Investment Transactions

12.13.1. Contingent liability investment transactions, which are margined, require the Client to make a series of payments against the purchase price, instead of paying the whole purchase price immediately. The Margin requirement will depend on the underlying asset of the Financial Instrument. Margin requirements can be fixed or calculated from current price of the underlying instrument and it can be found on the website of the Company.

12.13.2. If the Client trades in futures or Contracts for Differences, he may sustain a total loss of the funds he has deposited, to open and maintain a position. If the market moves against the Client, he may be called upon to pay substantial additional funds at short notice, to maintain the position. If the Client fails to do so within the time required, his position may be liquidated at a loss and he will be responsible for the resulting deficit. It is noted, that the Company will not have a duty to notify the Client for any Margin Call, to sustain a loss making position.

12.13.3. Even if a transaction is not margined, it may still carry an obligation to make further payments in certain circumstances, over and above any amount, paid when the Client entered the contract.

12.13.4. Contingent liability investment transactions, which are not traded on or under the rules of a recognised or designated investment exchange, may expose the Client to substantially greater risks.

12.14. Collateral

12.14.1. If the Client deposits collateral, as security with the Company, the way in which it will be treated will vary according to the type of transaction and where it is traded. There could be significant differences in the treatment of the collateral, depending on whether the Client is trading on a recognised or designated investment exchange, with the rules of that exchange (and the associated clearing house) applying, or trading off-exchange. Deposited collateral may lose its identity, as the Client's property once dealings on the Client's behalf are

undertaken. Even if the Client's dealings should ultimately prove profitable, he may not get back the same assets, which he deposited, and may have to accept payment in cash.

12.15. Suspensions of Trading

12.15.1. Under certain trading conditions, it may be difficult or impossible to liquidate a position. This may occur, for example, at times of rapid price movement, if the price rises or falls in one trading session to such an extent, that under the rules of the relevant exchange trading is suspended or restricted. Placing a Stop Loss will not necessarily limit the Client's losses to the intended amounts, because market conditions may make it impossible to execute such an Order at the stipulated price. In addition, under certain market conditions, the execution of a Stop Loss Order may be worse than its stipulated price and the realized losses can be larger than expected.

12.16. No Delivery

12.16.1. It is understood that the Client has no rights or obligations in respect of the Underlying Assets, relating to the CFDs or Binary Options he is trading. There is no delivery of the underlying asset.

12.17. Slippage

12.17.1. Slippage is difference between the expected price of a Transaction in Financial Instruments, and the price the Transaction is actually executed at. Slippage often occurs during periods of higher volatility (for example due to news events), making an Order at a specific price impossible to execute, when market orders are used, and also when large Orders are executed, when there may not be enough interest at the desired price level to maintain the expected price of trade.

13. No Guarantees of Profit

13.1. The Company provides no guarantees of profit, nor of avoiding losses, when trading in Financial Instruments. Customer has received no such guarantees from the Company or from any of its representatives. Customer is aware of the risks inherent in trading in Financial Instruments and is financially able to bear such risks, and withstand any losses incurred.
